| Project Name        | FlowRoute                                                                                                                                                                                                                                                                                                                                                                 |
| Project Brief       | FlowRoute is a web-based smart task routing system designed for a personal brand content agency. The system automates the assignment of video editing tasks to the appropriate editing pod based on real-time workload data, replacing the current manual process where a Product Owner acts as a bottleneck at three separate points in the content production workflow. |
| Academic Year       | 2024/25                                                                                                                                                                                                                                                                                                                                                                   |
| Project Type        | Real Client Project                                                                                                                                                                                                                                                                                                                                                       |
| Client / OS Project | Sankhaja Hapukotuwa                                                                                                                                                                                                                                                                                                                                                       |
